Summary of the main target scenario for OSLC PLM

A system responsible, i.e. a Systems Engineer, in a Business unit, needs to respond quickly and accurately to requests for product and system changes to meet responsiveness and cost objectives

1 create the change request for product update and make available to the responsibles

2 prepare an update to the system requirements to fully specify the change request, working on the appropriate areas, re-using relevant requirements and calling upon other contributors, as needed, to meet the business objectives

3 prepare and oversee an update of the full system definition as an implementation of a solution to the change request, working on the appropriate areas, re-using or designing relevant content and calling upon other contributors, as needed, to meet the system objectives
